Full-stack developer with experience integrating machine learning models into web applications using Flask, NumPy, and Pandas. Skilled in building frontend interfaces with React and Angular, and developing backend systems using .NET Core Web API, Django and Express.js. Built real-world projects including spam detection, health prediction, and recommendation systems using KMeans clustering. Interested in developing scalable, data-driven web applications and deploying ML-powered solutions.

SKILLS

Languages	Frameworks & Libraries	Database & Tools
HTML, CSS, JavaScript, Python, PHP, Java	React.js, Angular, Next.js, Express.js .NET Core web API, EF Core, TailwindCSS, Numpy, Pandas	MySQL, PostgreSQL, Git GitHub

PROJECTS

Email with Spam Detection – React.js, Django, SQLite, TailwindCSS, Numpy, Pandas

- Developed a client server email system to separate and block spam mails from hams
- Integrated various machine learning models in the system that predict mail spam possibility.
- Added some basic cryptography features for message encryption/decryption as well.

GitHub – <https://github.com/Pranav-Sthapit/Email-with-spam-detection>

Health and Fitness Prediction System – Angular, Express, Postgres, Flask, Numpy, Pandas

- Developed a system that identifies if a person is fit or not using his weight, height, and many more.
- Calculates the activity level of the user through various questions.
- Calculates the nutrition level of user through various questions.

House Rental System – Angular, .NET Core WEB API, Postgres, Dapper, EF Core, Flask, KMeans

- Developed a system for renting houses from various locations.
- Used various concepts like Dependency Injection, Repository Patterns, etc.
- Use of Cluster based filtering for searching relevant rentals.

GitHub – https://github.com/Pranav-Sthapit/house_renting_system

Online Freelancing Platform– Next.js, Express, Postgres

- Developed a simple client server online freelancing platform for finding jobs and hiring people.
- Integrated online payment using e-sewa demo API.
- Made the project with friends dividing tasks in between.

EDUCATION

Bachelor of Computer Application

National College of Computer Studies

+2 in Management (Computer Science)

New Zenith English Model School

Paknajol, Kathmandu

December 2022 – Present

Tamsiphaka, Bhurungkhel

May 2020 – June 2022
